

On behalf of the Royal Children's Hospital Foundation I would like to thank you for kindly creating the lighting design for our Wonder Factory refurbishment. Your experience, professionalism and assistance are all truly appreciated.

The generosity and commitment to this project has been overwhelming and we are so grateful for your contribution. We pride ourselves on providing necessary, yet often overlooked services to both the hospital and families. Our Wonder Factory is an integral part of this mission, and allows us to impact on the lives of not only patients, but siblings, families, and medical staff.

The room and its various activities are a much needed distraction to many of the hospital's little visitors. It makes their time in hospital a bit more enjoyable, and gives them a chance to do what kids do best – play and have fun!! Being a charity, it can sometimes prove a little challenging financially to provide such opportunities, so we really appreciate this wonderful donation – we certainly could not have achieved such outstanding results without the help of community-minded businesses such as Australian Glow.

Thank you once again, from everyone here at the Royal Children's Hospital and Foundation, and a very special thank you from all the little patients – you've helped put big smiles on little faces!

Warm regards,
